

ThyssenKrupp Gft Bautechnik in Australia

Takeover of Sheet Pile specialist Steelcom

It is with considerable pride that we announce that ThyssenKrupp Gft Bautechnik and Steelcom Pty Ltd have reached an agreement for the sale of Steelcom business to ThyssenKrupp.

With effect Wednesday 19 December 2007, Steelcom has joined the ThyssenKrupp international business. ThyssenKrupp has worldwide operations with a turn-over in excess of EUR55 billion and 191,000 employees worldwide.

Steelcom offers ThyssenKrupp a strong footprint in the Australia/New Zealand market and is consistent with ThyssenKrupp approach to the market offering availability of Sheet Piles and Piling equipment.

The marriage of the two provides Steelcom with access to improved stock availability, technical support and new products and suppliers.

Business operations and staffing levels will remain unchanged as Steelcom is integrated into the ThyssenKrupp business model, but offers opportunities for customer service improvements through new systems and processes.

Steelcom was started some 25 years ago as a small business and has gone on to create a unique value proposition in the market.

Our commitment to **Professional. Reliable. Personal** service remains unchanged.

For any queries about the company name change, please contact 02 9954 9166.

New ABI MobilRam System TM13/16

Steelcom has acquired a new ABI 13/16 Mobilram to complement its piling equipment and fleet hire.

The proven ABI Mobilram system is ideally suited to Australian civil drilling and piling requirements.

The new ABI 13/16 Mobilram provides the flexibility and capacity to handle compacted ground conditions, with the combination of pre-drilling and sheet pile driving capability in one unit.

The self erecting telescopic mast offers compact transport dimensions and rapid on-site set up, while the 180 degree slewing capability allows corners and difficult sites to be handled with ease.

Site productivity is delivered through immediate mobilization, the rapid changing device for attachments, straight line wall accuracy and the capacity to drive 16m sheet piles under the vibro hammer.

Available for hire from mid April 2008. For more info, contact our Sales at 02 4966 0688.
